Cardio Arginine

*lactose- &
gluten-free*

PER DAILY DOSIS:
1500 mg L-Arginine

**Supports vascular function
and blood circulation**

L-Arginine is a semi-essential amino acid that is involved in various functions in the body: it is for instance necessary for wound healing or for kidneys function. However **L-Arginine** is most prominently known to play a positive role in cardiovascular health. Indeed **L-Arginine** is the precursor of **Nitric oxide**, a potent vasodilator that helps blood vessels to relax, thereby improving circulation. Nitric oxide increases the supply of the heart with oxygenated blood which in turn supports heart function.

L-Arginine may be supplied through the diet. Natural sources of L-Arginine are for instance red meat, poultry, fish and dairy products.

When **L-Arginine** intakes are low, or when body needs are high, it is useful to take a supplement with **high-potency Cardio Arginine** from **Doppelherz® system**.

Daily intake of 2 capsules of **Doppelherz® system Cardio Arginine** supplies the organism with 1500 mg L-Arginine to support vascular function and blood supply to all organs.

One capsule contains:
750 mg L-Arginine

Recommendations:
Take 2 capsules daily at meal with enough liquid. Do not chew.

Do not exceed the stated recommended daily dosage!
Food supplements should not be used as a substitute for a varied diet.
The product should be stored out of the reach of children.

This product is not suitable for children, adolescents, pregnant and lactating women, as well as for patients who suffered from a myocardial infarction. Patients taking blood-thinning medications, nitrates-containing drugs or prescriptions against erectile dysfunction should ask their doctor before taking this product.

Do not store above 25 °C.

Energetic value:
1 capsule corresponds to 0.5 kcal/2 kJ.
