

Omega-3 +Folic acid+B6+B12

*lactose- &
gluten-free*

Daily dosage:
2000 mg Salmon oil
360 mg EPA
240 mg DHA
+ 600 µg Folic acid
+ Vitamin B6+B12+E

Food supplement

For all keeping an eye on cholesterol level and blood fat values

Well being and capability can be influenced by life style. Therefore enough sport and a healthy diet are important elements. Also for a healthy heart and cardiovascular system the Cholesterol level and the balance of Triglycerides and Homocystein plays an important role.

The beneficial effect of Omega-3 fatty acids had been detected among Eskimos in Greenland. Their nutrition is unbalanced and the intake of fat is very high, but their circulation is healthy also among elder people. Today it is known that this effect is based on the high intake of Omega-3 fatty acids by their main food category fish.

Omega-3 fatty acids play an important role for a heart healthy nutrition, in particular for the balance of cholesterol and triglycerides.

Omega-3 fatty acids in combination with Folic acid, Vitamin B₆ and Vitamin B₁₂ have a positive influence on the Homocystein level. A balanced Homocystein level is important for the function of the vessels. Folic acid and B-Vitamins are also necessary for the genesis of red and white blood cells which are important for cell division and regeneration as well as oxygen transport.

Therefore these nutrients play a role for a heart healthy nutrition.

Especially in case of an unbalanced diet the supply with Folic acid is too low and doesn't comply with the recommended intake.

Omega-3 fatty acids are essential!

Omega-3 fatty acids can't be synthesised by the body and therefore should be taken in with food. Important fatty acids of this group are Eicosapentaenic acid (EPA) and Docosahexaenic acid (DHA).

Omega-3 fatty acids play an important role in a heart healthy diet. Additionally these long chained, poly unsaturated fatty acids are needed for the function of brain and retina.

In case of a cholesterol and fat rich nutrition with a low intake of fish, the supplementation with Omega-3 fatty acids can help to balance the triglyceride levels.

The recommended daily dosage (= 2 capsules) contains:

2000 mg Salmon oil including 600 mg Omega-3 fatty acids (thereof 360 mg EPA and 240 mg DHA), 20 mg Vitamin E, 600 µg Folic acid, 6 mg Vitamin B₆, 6 µg Vitamin B₁₂.

Recommendation:

Take 2 capsules daily at meal with enough liquid. Do not chew.

Do not exceed the stated recommended daily dosage! Food supplements should not be used as a substitute for a varied diet. The product should be stored out of the reach of young children.

Energetic value:

1 capsule corresponds to 12 kcal/50 kJ.

Do not store above 25 °C.

This food supplement contributes in balancing your blood fat level, Cholesterol and Homocystein level and provides your body with essential nutrients.

Doppelherz® aktiv capsules are without taste and odour.

THÀNH PHẦN:

Công thức cho mỗi 2 viên:

Dầu cá tự nhiên.....	2000 mg
Omega-3.....	600 mg
EPA.....	360 mg
DHA.....	240 mg
Folic acid.....	600 µg
Vitamin E.....	20 mg
Vitamin B ₆	6 mg
Vitamin B ₁₂	6 µg

CÔNG DỤNG:

- Bổ sung các vitamin, khoáng chất và các dưỡng chất thiết yếu cho cơ thể.
- Giúp hỗ trợ phát triển não bộ và làm đẹp da.

ĐỐI TƯỢNG SỬ DỤNG:

Dùng cho đối tượng trên 10 tuổi, người suy giảm trí nhớ, da khô sạm.

LIỀU DÙNG & CÁCH DÙNG:

Uống 2 viên / lần / 1 ngày trong bữa ăn. Không được nhai.

Lưu ý:

- Sản phẩm này không phải là thuốc và không dùng để thay thế thuốc chữa bệnh.

QUY CÁCH: Hộp 3 vỉ x 10 viên.

BẢO QUẢN: Nơi khô mát, nhiệt độ không quá 25 °C. Để xa tầm tay trẻ em.

HẠN SỬ DỤNG: Xem trên hộp sản phẩm.
